Acknowledgement of Participation

Study "Human line drawings as an instrument to identify diagnostic features underlying object recognition"

We invite you to take part in a research study with the Justus-Liebig-Universität Gießen, Germany. Please read the following information carefully before you decide to engage in our study. Your participation is voluntary and you may choose to withdraw from it anytime without negative consequences or having to state your reasons. You can do so by simply returning the task, which will close the task. In case you choose to withdraw from participation, we will discard any gathered data. The task session will close automatically after a timeout visible in the description of the task, in which case the task will be automatically returned, and no data will be recorded. This study was approved by the ethics committee of Justus-Liebig-Universität Gießen. (ethics number AZ111/22)

Aims of the study

We are interested in how the mind stores different templates of natural objects. This study aims to investigate how people represent objects. We hope that this will improve our understanding of the mental representations that guide us through our world.

Scope of study participation

Your task, including the length and content of study participation and the type of collected data, are visible in the description of the task.

Inclusion and exclusion criteria

You may participate in this study if you understand the provided study information, give your informed consent by clicking the box, and are at least 18 years old. Beyond that, there are no explicit exclusion criteria.

Risks of participation

There are no known risks to participating in the behavioral study. However, if you feel uncomfortable participating, please end your participation by

closing your browser window. Please remember that this online study is conducted in accordance with the terms of service of your service platform Cloudresearch Connect, which concerns both us as experimenters as well as you as a participant.

Insurance

By nature of participants being recruited with pseudonyms and by the platform Cloudresearch Connect you are not covered by the public liability insurance of the Justus-Liebig-Universität Gießen .

Expenses

The reimbursement for your participation is visible in the description of the task.

Benefit of this study

This study is being conducted for the purpose of basic scientific research. This means that participants will receive no direct benefit from it beyond reimbursement. The findings obtained in the course of this study are expected to help improve our knowledge in the field of object recognition.

Any other questions?

If you have any other questions about the various stages of the study, data protection, your rights, or wish to receive a PDF version of the consent forms, please contact the head of the study: Daniel Kaiser - danielkaiser.net@gmail.com

Your agreement to take part in this study would be much appreciated. Many thanks!
